Subject: Proposed Settlement is a bad idea

Dear DOJ;

I have been following the microsoft case since the beginning, and recently it has come to my attention that I can voice my opinion about how badly you are handling the punishment that is due to microsoft for their unethical practices.

Please do something, this company was proved to use monopolistic practices to keep their company on top. In my own humble opinion this is a form of terrorism, a company takes illegal measures to help fulfill its goals, stepping on everyone and everything that gets in its way. Including the American Government.

You, my goverment, are the only ones that can stop this, now would you please help me to put some faith back into the system!

Sincerely,
Bryce Verdier
